Marks : 1

Comprehension:

Read the given passage and answer the questions that follow.

More than 40 years ago, Roy, now 69, founded the Barefoot College in Tilonia, Rajasthan. His school admits rural women, often grandmothers and teaches them the basics of solar engineering and freshwater technology. His efforts have yielded enormous benefits. When the women return to their homes, they are trained enough to provide their communities, some of the world's most lonely places, with electricity and clean water. They also gain something important: a newfound self-confidence. The Barefoot model has already been used to empower women throughout Asia, Africa, and Latin America.

If you go all over the world, to very remote villages, you will often find only very old people and very young people. The men have already left as they are restless, ambitious, and the moment you give one of them a certificate, he leaves the village looking for a job in the city. That is how, the simple, practical solution of training grandmothers came up. They are sympathetic, tolerant, willing to learn, and patient. But no certificates are awarded because the moment a certificate is given, a woman, like a man, sees it as a passport for leaving rural areas.

Barefoot College follows the lifestyle of Mahatma Gandhi: Students eat, sleep, and work on the floor. As of today, 604 women solar engineers from 1083 villages in 63 countries have been trained. The engineers have given solar power to 45,000 houses. This was done by women who had never left their homes before. They hate the idea of leaving their families and getting on a plane. When they reach India, sometimes after 19 hours of travel, they are faced with strange food, strange people, and a strange language. All the training is done in sign language. Yet in six months, they learn more about solar engineering than most university graduates. On their return they get enormous respect and consider themselves no less than solar engineers. Bunker Roy dreams of providing the world's 47 least developed countries with Barefoot College trained grandmothers and solar electrifying more than 1,00,000 houses.

SubQuestion No : 26

Q.26 Which of these traits make grandmothers ideal students ?

- (i)Patience
- (ii)Simplicity
- (iii)Ambition
- (iv)Willingness to learn

Ans 1. ii and iii

2. i and iv

3. ii and iv

4. i and ii
